

Sports Blend

Deep Green, Fine Leaf and Winter Hardy

GTI Sports Blend is an extremely attractive and high quality, yet inexpensive blend of turf ryegrass. It is primarily formulated for open space sports field use, where winter activity and recovery from wear is essential. This 3-4 way blend of North American varieties is classified as VNS (Variety Not Specified). That means that no royalties apply to its production. This seed regularly becomes available when excess seed is produced or when world ryegrass markets soften. When VNS product comes from a trusted supplier it can represent excellent value. Such is the case with **GTI Sports Blend**.

Uses

- Municipal Sportsfields
- School fields and general grounds
- Passive parks where a premium grade seed is not required

Agronomic characteristics

- Genetic diversity gives this blend strong performance characteristics during most seasonal variations
- Outstanding drought tolerance
- Dense dark green sward
- Fast establishment

Seeding rates

- 30g/m² to 50g/m²
- 300kg/ha to 500kg/ha
