DO NOT water or cut grass for 24hrs after treatment.

Situation	Weeds Control	State	Rate	Per	Critical Comments
			100m ²	ha	
Common Couch Lawns & Turf	Paspalum Summer grass Crabgrass (crowsfoot grass) Mullumbimby Couch	NSW Vic SA Qld ACT Only	180mL	18L	Apply as a foliar spray in a min. 100L water/1000 sq. m, or 1000L/ha. Add Ultrawet wetter at 300m/1000 sq. m or 3L/ha. Apply again 7-10 days later, and again 21-30 days after that. If necessary, irrigate prior to treatment, but do not water for 24 hours after treatment.
		WA only	100mL	10L	
Bent and Fescue lawns and Turf	Paspalum Summer grass Crabgrass (crowsfoot grass) Mullumbimby Couch	NSW Vic Qld ACT Only	75mL	7.5L	
		SA only	90mL	9L	

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

THIS PRODUCT IS TOO HAZARDOUS TO BE RECOMMENDED FOR USE IN THE HOME GARDEN.

Passtox

GENERAL INSTRUCTIONS

Do NOT use on Buffalo, Kikuyu, Queensland Blue Couch, Carpet or Centipede grass as injury will occur. In hot weather temporary yellowing may occur. Risk of damage increases with temperatures over 30°C. Injury will also occur on Bent or Fescues if the recommended rates are exceeded. Passtox Flowable is most effective on actively growing weeds at air temperatures above 21°C. Do NOT treat new lawns until after 3 mowings.

MIXING: Add the required amount of Passtox Flowable to water and stir thoroughly until dissolved. Then add Ultrawet as required. Do NOT store spray solution in tank for prolonged periods.

RESISTANT WEED WARNING

GROUP K HERBICIDE

Passtox Flowable Herbicide is a member of the organoarsenic group of herbicides. Passtox Flowable is a herbicide with diverse sites of action. For weed resistance management Passtox Flowable is a group K herbicide. Some naturally occurring weed biotypes resistant to Passtox Flowable and other herbicides with diverse sites of action may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Passtox Flowable or other herbicides with diverse sites of action. Since the occurrence of resistant weeds is difficult to detect prior to use, Colin Campbell (Chemicals) Pty. Ltd. accepts no liability for any losses that may result from the failure of Passtox Flowable to control resistant weeds.

PROTECTION OF LIVESTOCK

DO NOT feed grass clippings from treated areas to poultry or other animals. Do not allow livestock to graze treated area.

PROTECTION OF WILDLIFE, FISH, CRUSTACEAN AND ENVIRONMENT

Toxic to fish. Do not contaminate streams, rivers or waterways with the chemical or used container.

PROTECTION OF CROPS, NATIVE AND NON-TARGET PLANTS

Do not apply under weather conditions or from spraying equipment which may cause spray to drift onto nearby susceptible plants, crops, crop lands or pastures.

STORAGE AND DISPOSAL

Store in the closed original container in a well ventilated area, as cool as possible out of direct sunlight. Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilizers. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals onsite. Break, crush, puncture and bury empty containers in a local authority landfill. If not available bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS

Poisonous if absorbed by skin contact or swallowed. May irritate the eyes and skin. Avoid contact with eyes and skin. When preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat and rubber gloves. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each days use, wash gloves and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed, and if more than 15 minutes from a hospital, induce vomiting, preferably using Ipecac Syrup APF. Additional information is listed in the Material Data Safety Sheet Ref No. msds 48

CONDITIONS OF SALE

Agricultural, horticultural and pastoral preparations in their application involve varying factors such as differing conditions, soil, climate and methods of application over which the vendor does not have control, Whilst Colin Campbell (Chemicals) Pty. Ltd believes that all goods sold by it are true to label and are effective and safe for purpose indicated the company and the seller hereby expressly negate and exclude any express or implied condition, statement or warranty, statutory or otherwise, as to quality or fitness of any goods sold for any purpose or purposes whatsoever except such warranties and conditions, if any, as are implied by the Trade Practices Act 1974 (Commonwealth). The company and the seller accept no responsibility for any loss, harm or damage whatsoever suffered from the use of such goods for any purpose or purposes irrespective of whether or not the buyer was acting in reliance upon the advice recommendation or representation of the seller or any representative agent of employee of the company as to such use except in respect of breaches of conditions and warranties, if any, implied by the Trade practices Act and in respect of such breaches the liability of the company and the seller shall be limited to the replacement of the goods or the supply of equivalent goods, or the payment of the cost of replacing the goods.
